

The FCC should not interfere and/or change any part of the Indiana Privacy Law. It is a protection that we are entitled to. My evenings are far more peaceful without having to screen unwanted call. I use to receive up to 7 or 8 calls a day or evening. Now, I don't even average one. Thank God! Let the solicitors waste their time and money on using the postal service. It provides more money for the economy and gives me the option to simply pitch it without having to explain to some high pressure salesperson, politely to leave me and my family alone.
